UAUT — College of ICT × TTCL · BSc ICT Practical Training · 24 Aug → 2 Oct 2026

Contents — one section per week, 3 diagrams each

Week 1	Orientation, Network Layout & PHP Project Kickoff	Mon 24/08 → Fri 28/08/2026
Week 2	Maintenance, Presentation 1, Backend Refactor & Inventory	Mon 31/08 → Fri 04/09/2026
Week 3	Linux CLI, RBAC, DB Indexing & GIS Mapping	Mon 07/09 → Fri 11/09/2026
Week 4	Python Automation, Async APIs, Security & Market Concurrency	Mon 14/09 → Fri 18/09/2026
Week 5	Sprint Review & Enterprise Web Server Deployment	Mon 21/09 → Fri 25/09/2026
Week 6	UAT, Data Migration, User Manual & Defense Prep	Mon 28/09 → Fri 02/10/2026

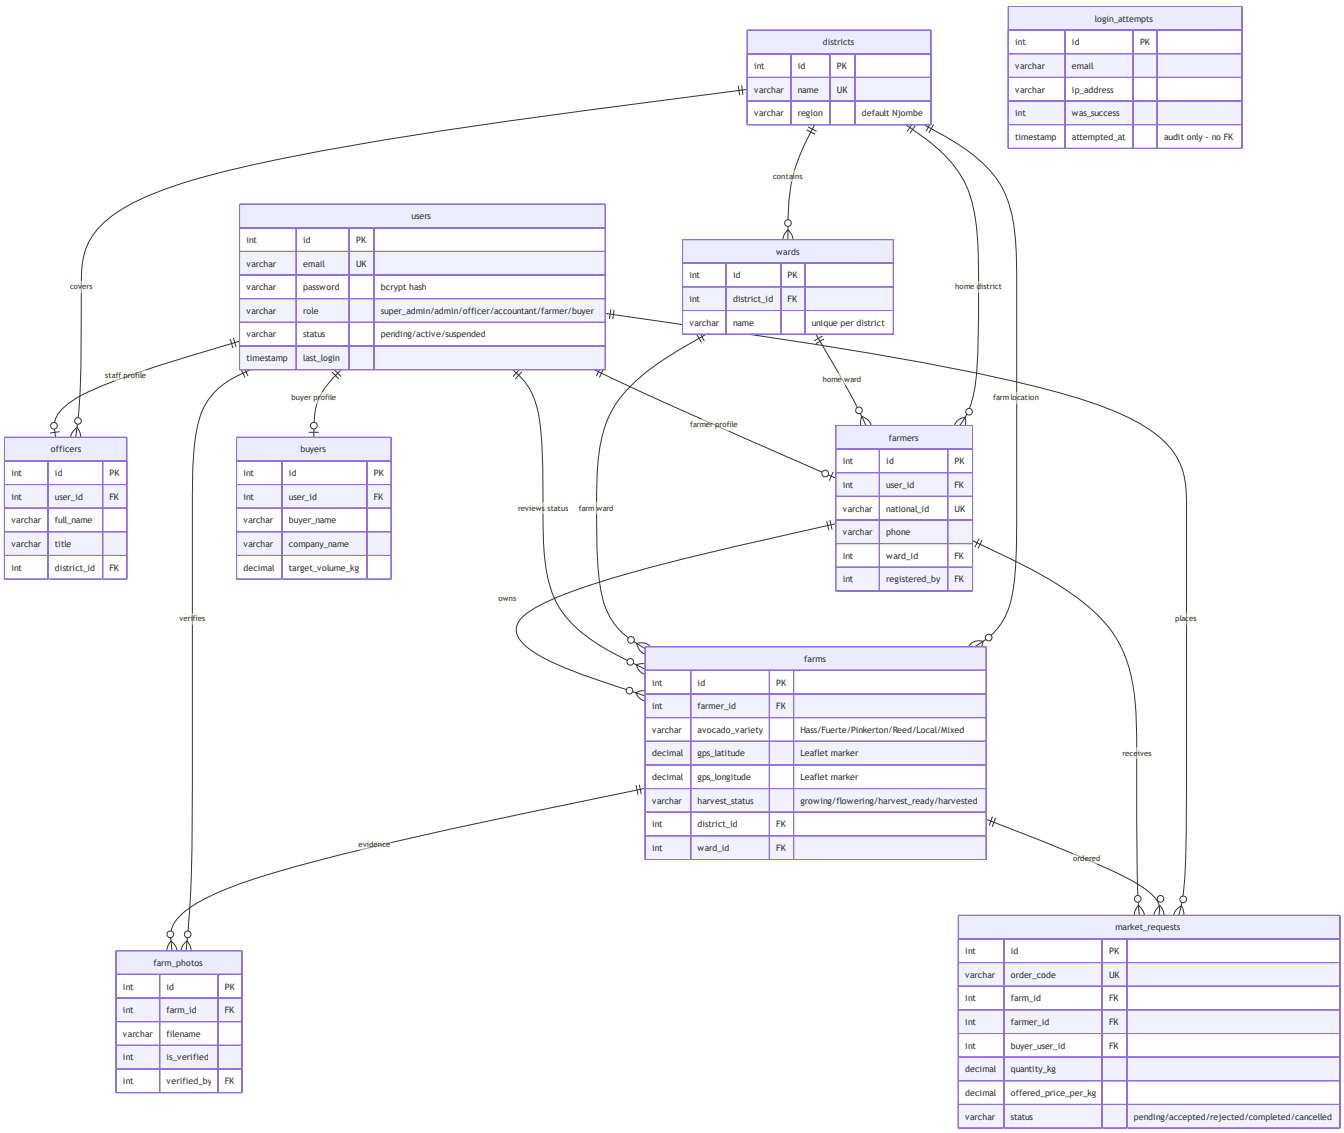

PART 0 — GLOBAL VIEW (README)

Diagram 1 — System Architecture

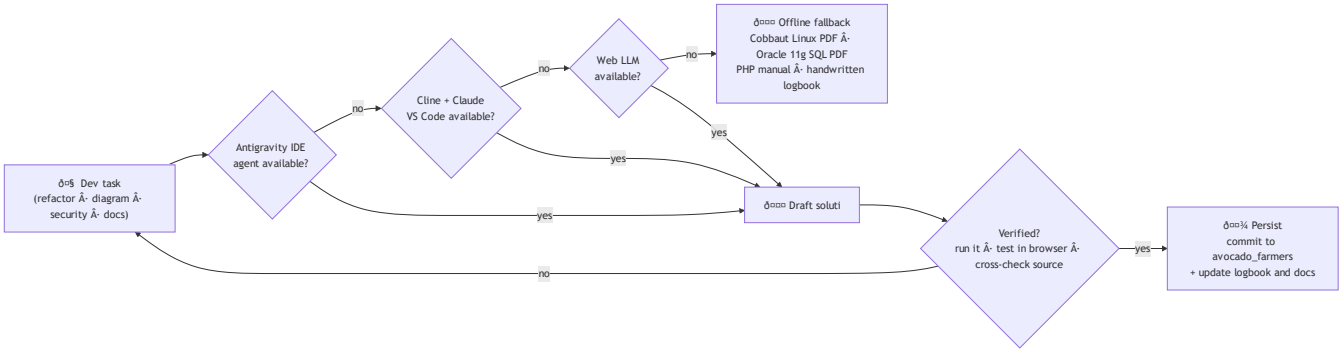

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

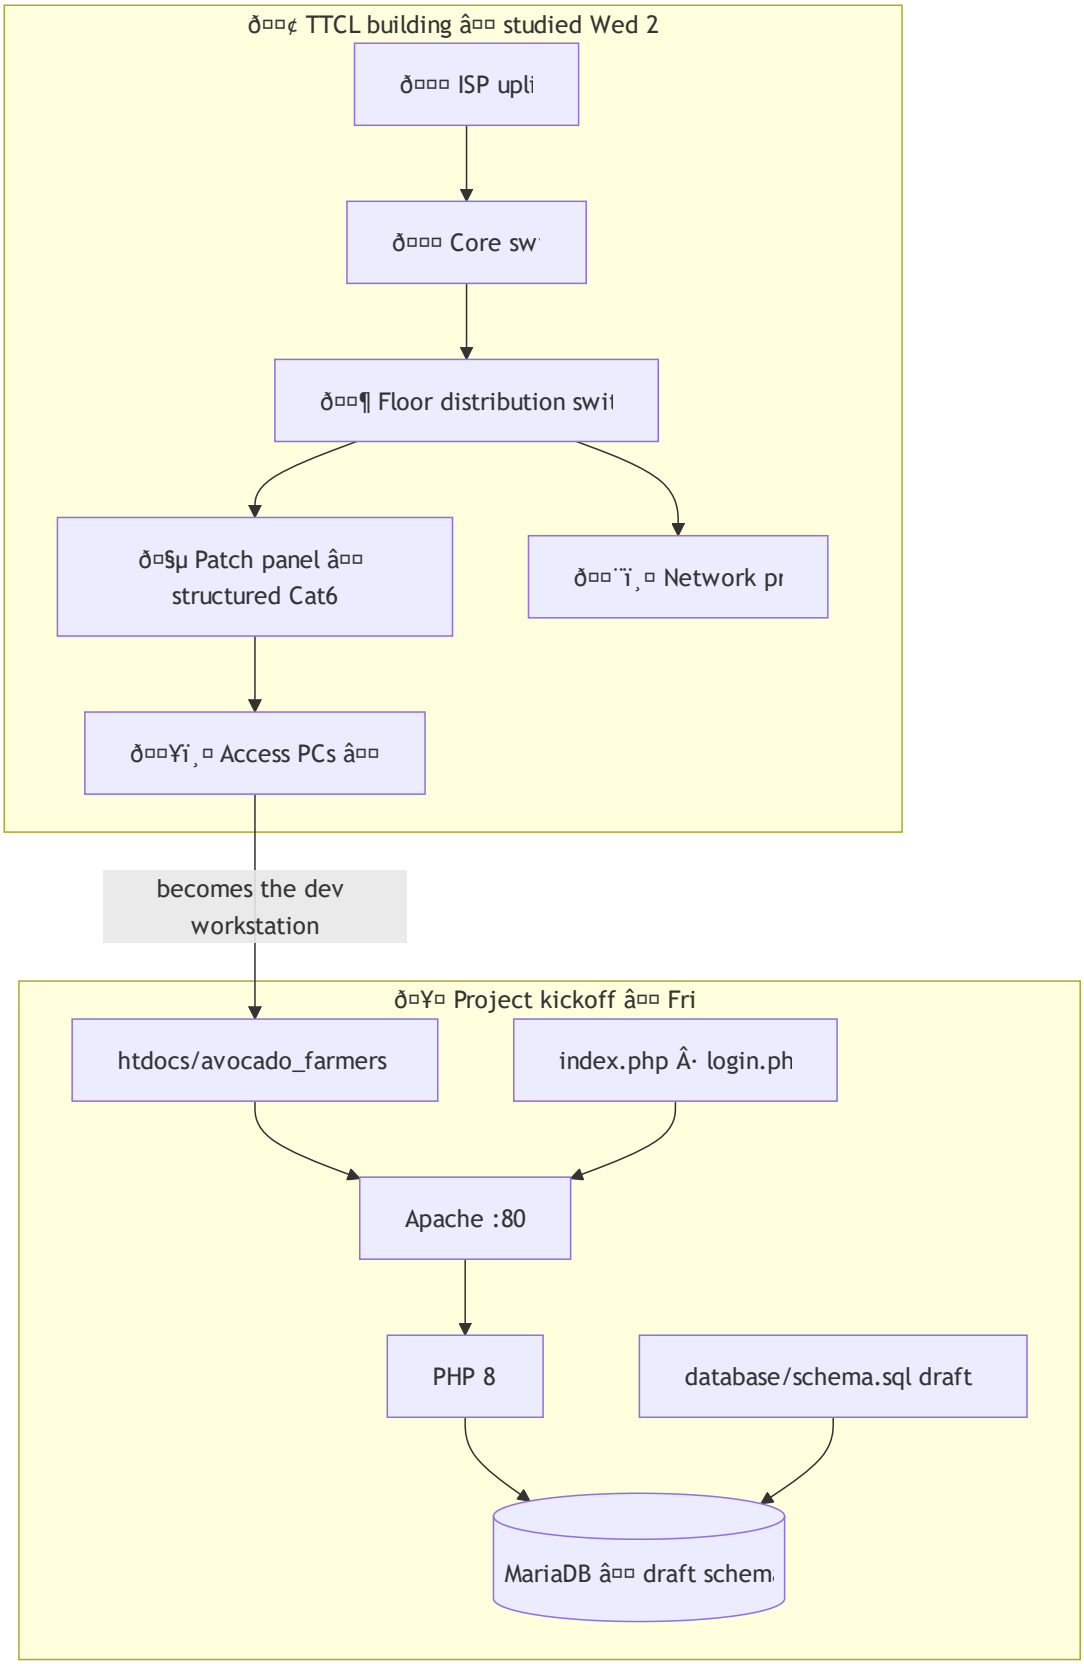

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

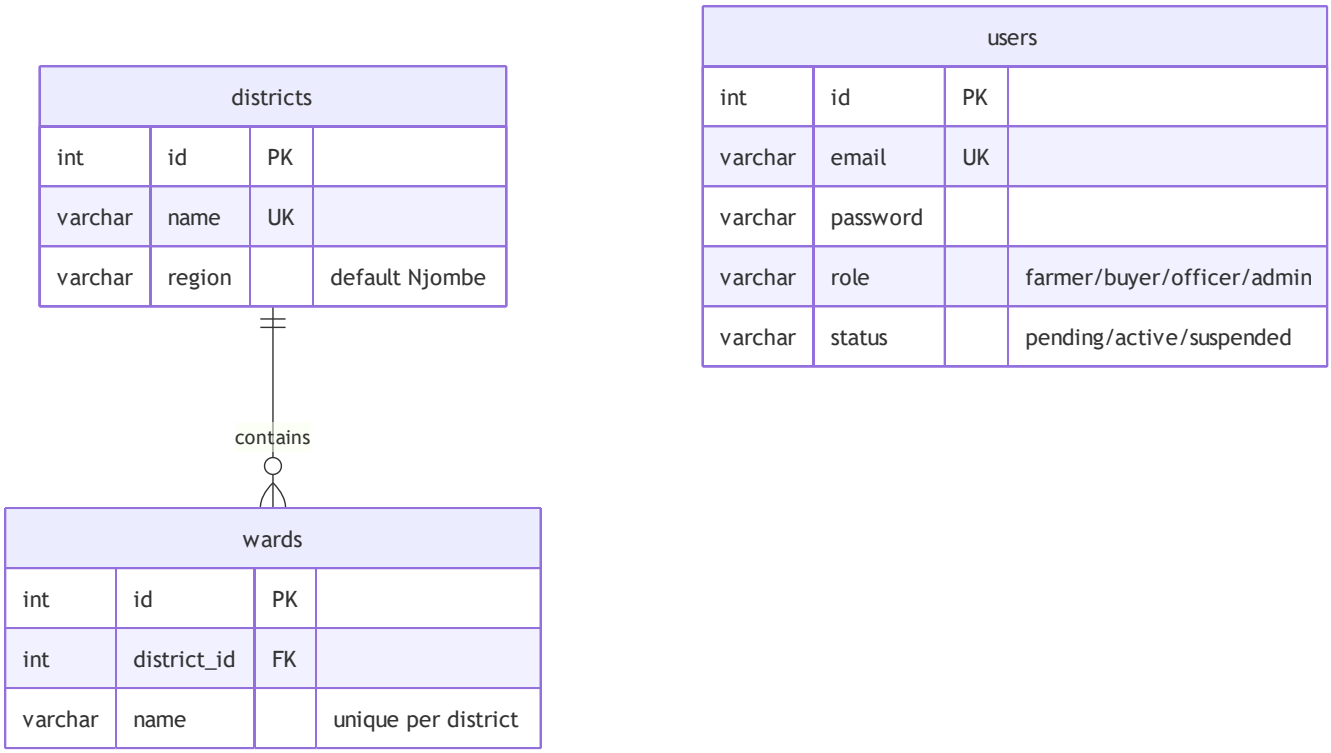

PART 1 — WEEK 1 — Orientation, Network Layout & PHP Project Kickoff

Diagram 1 — System Architecture

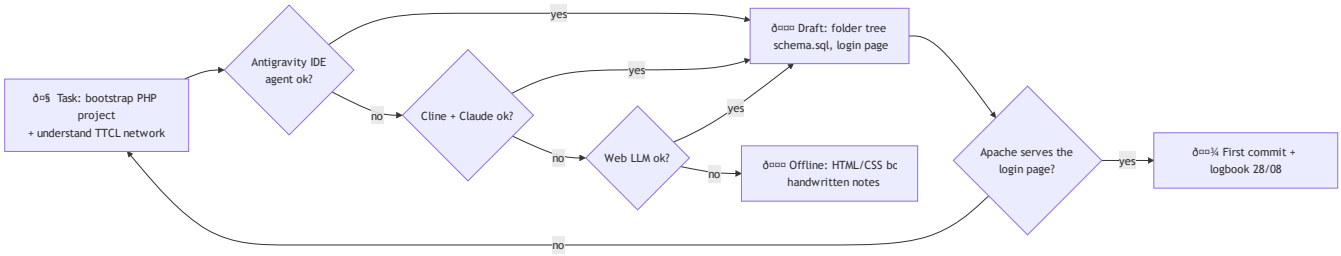

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

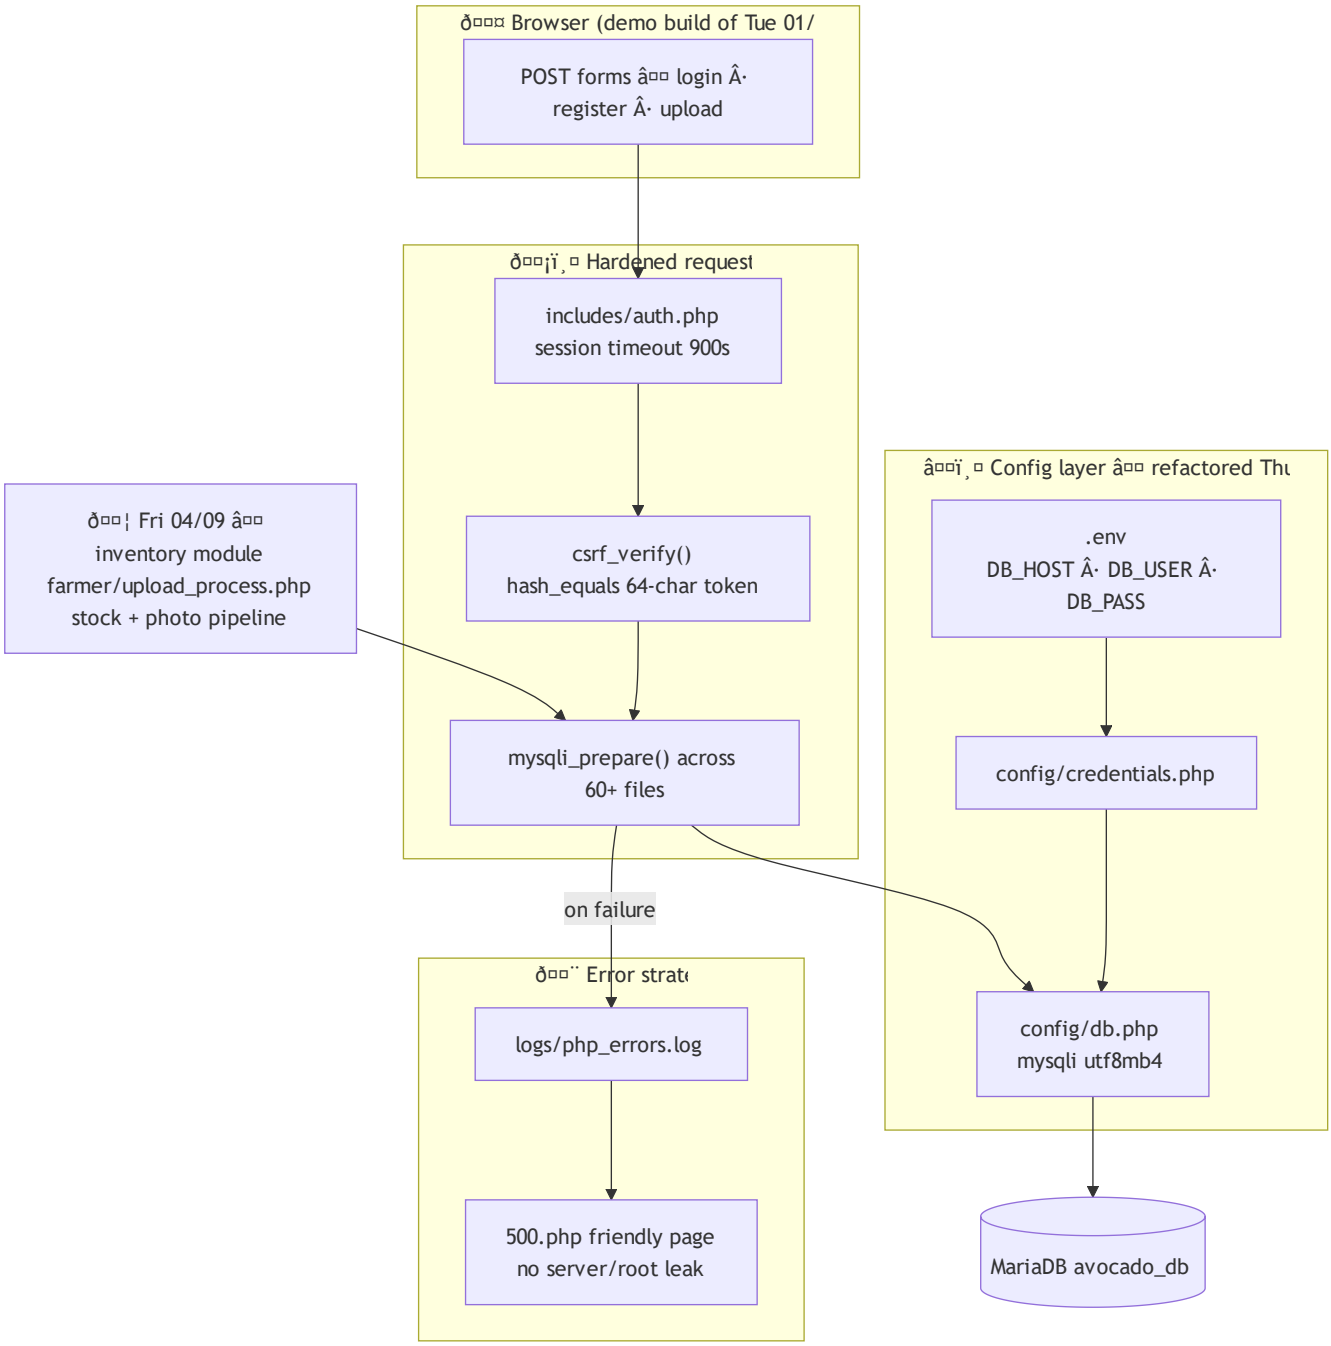

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

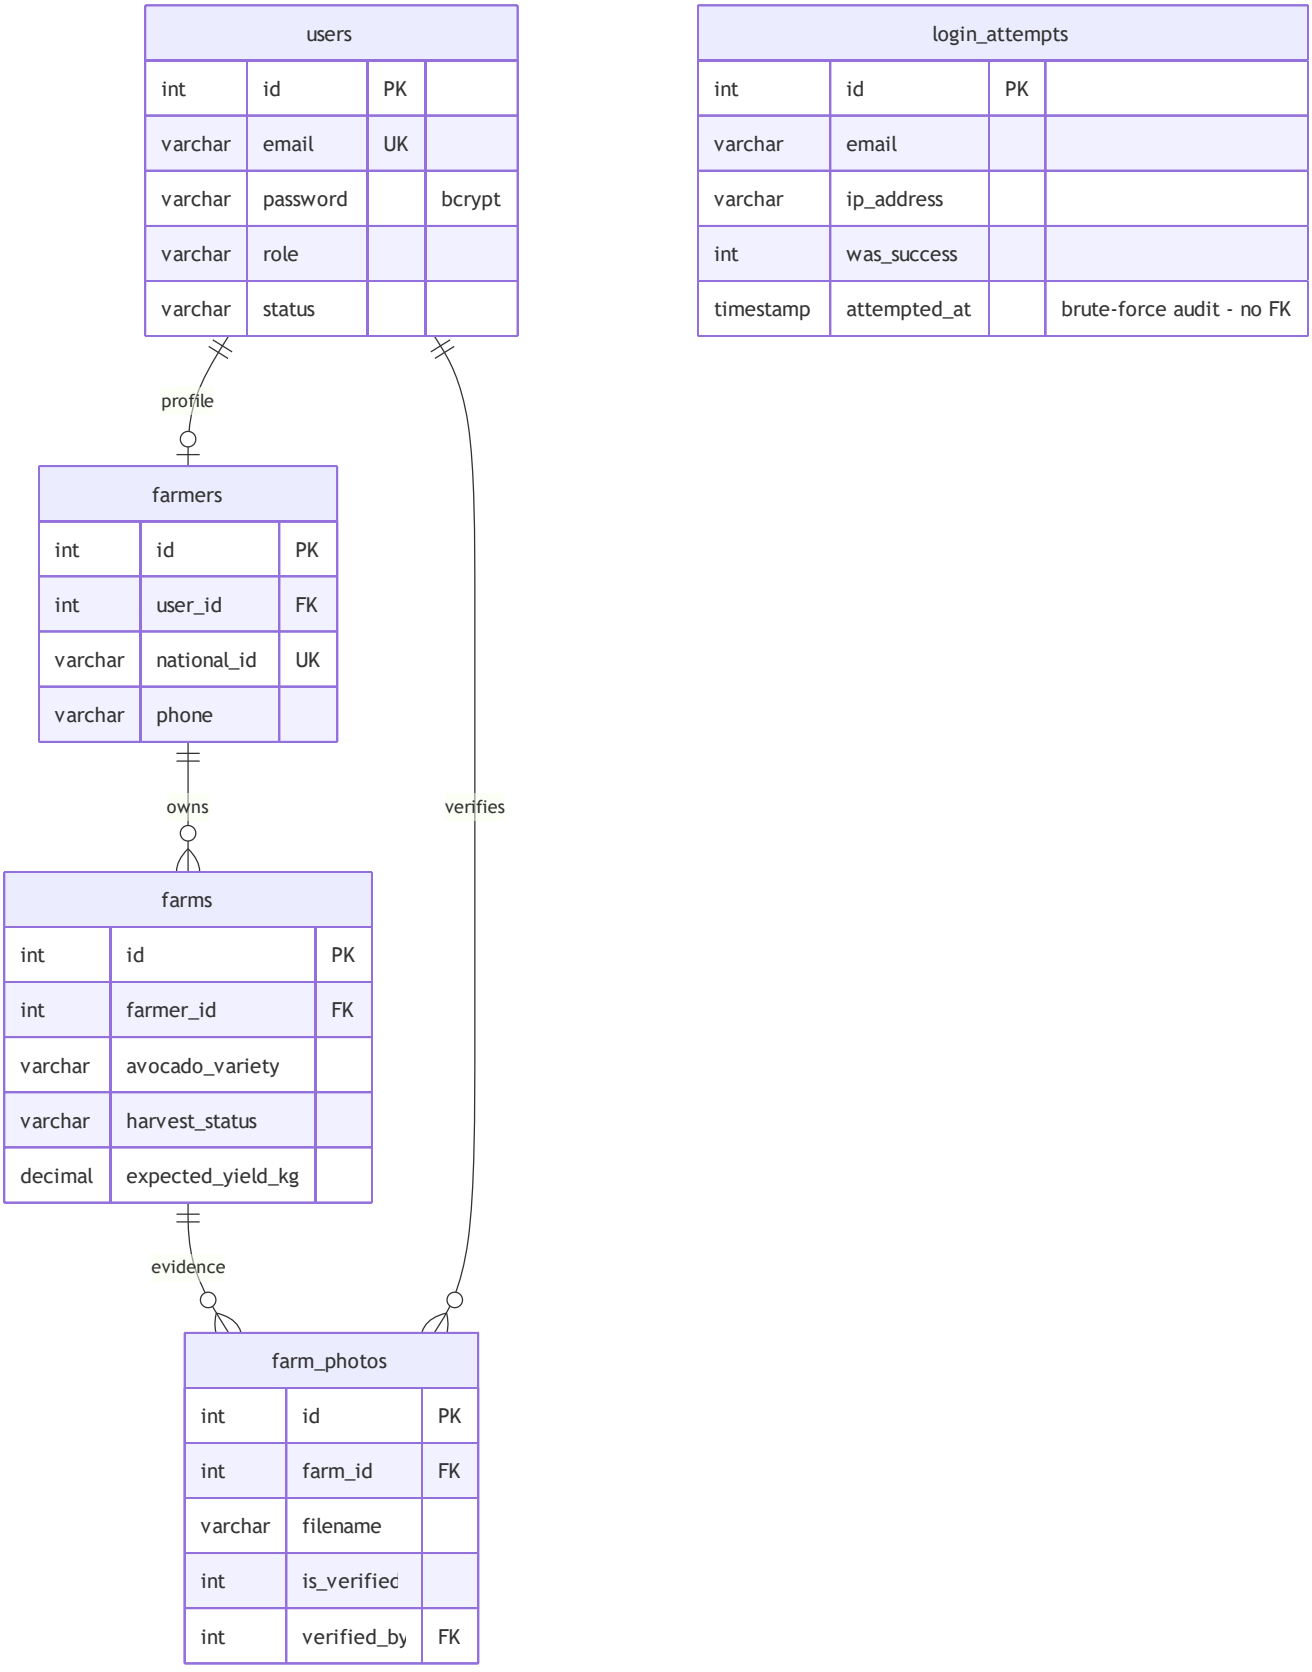

PART 2 — WEEK 2 — Maintenance, Presentation 1, Backend Refactor & Inventory

Diagram 1 — System Architecture

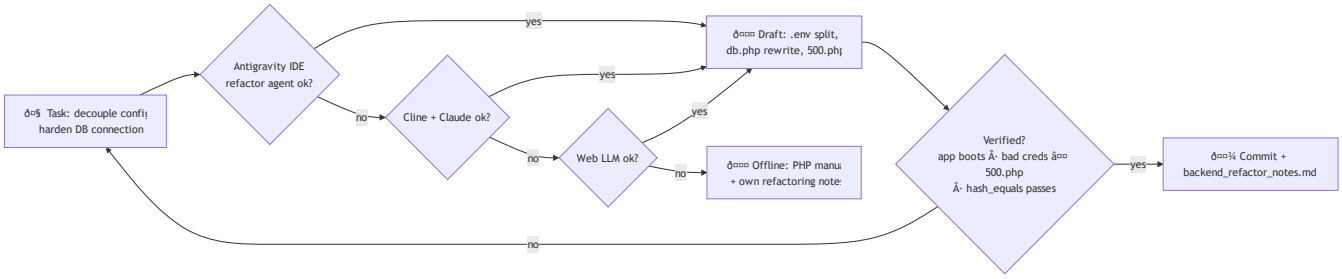

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

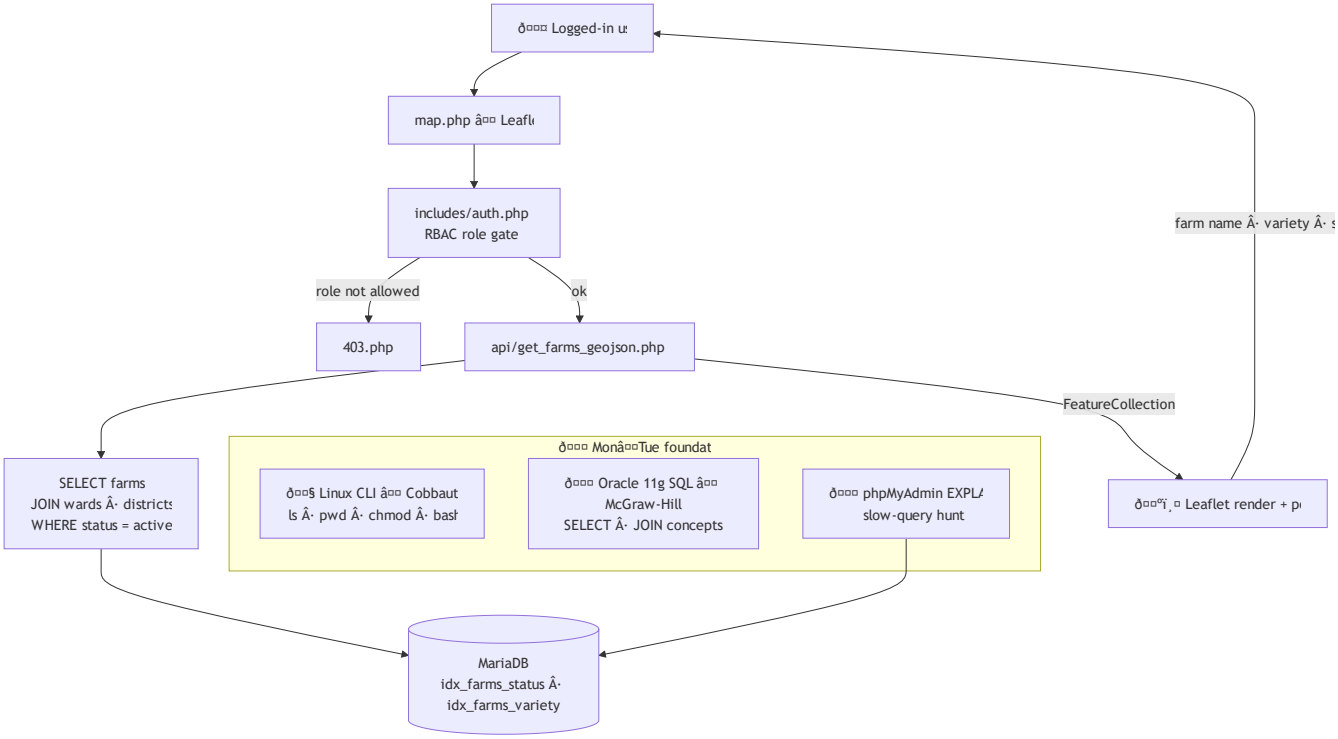

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

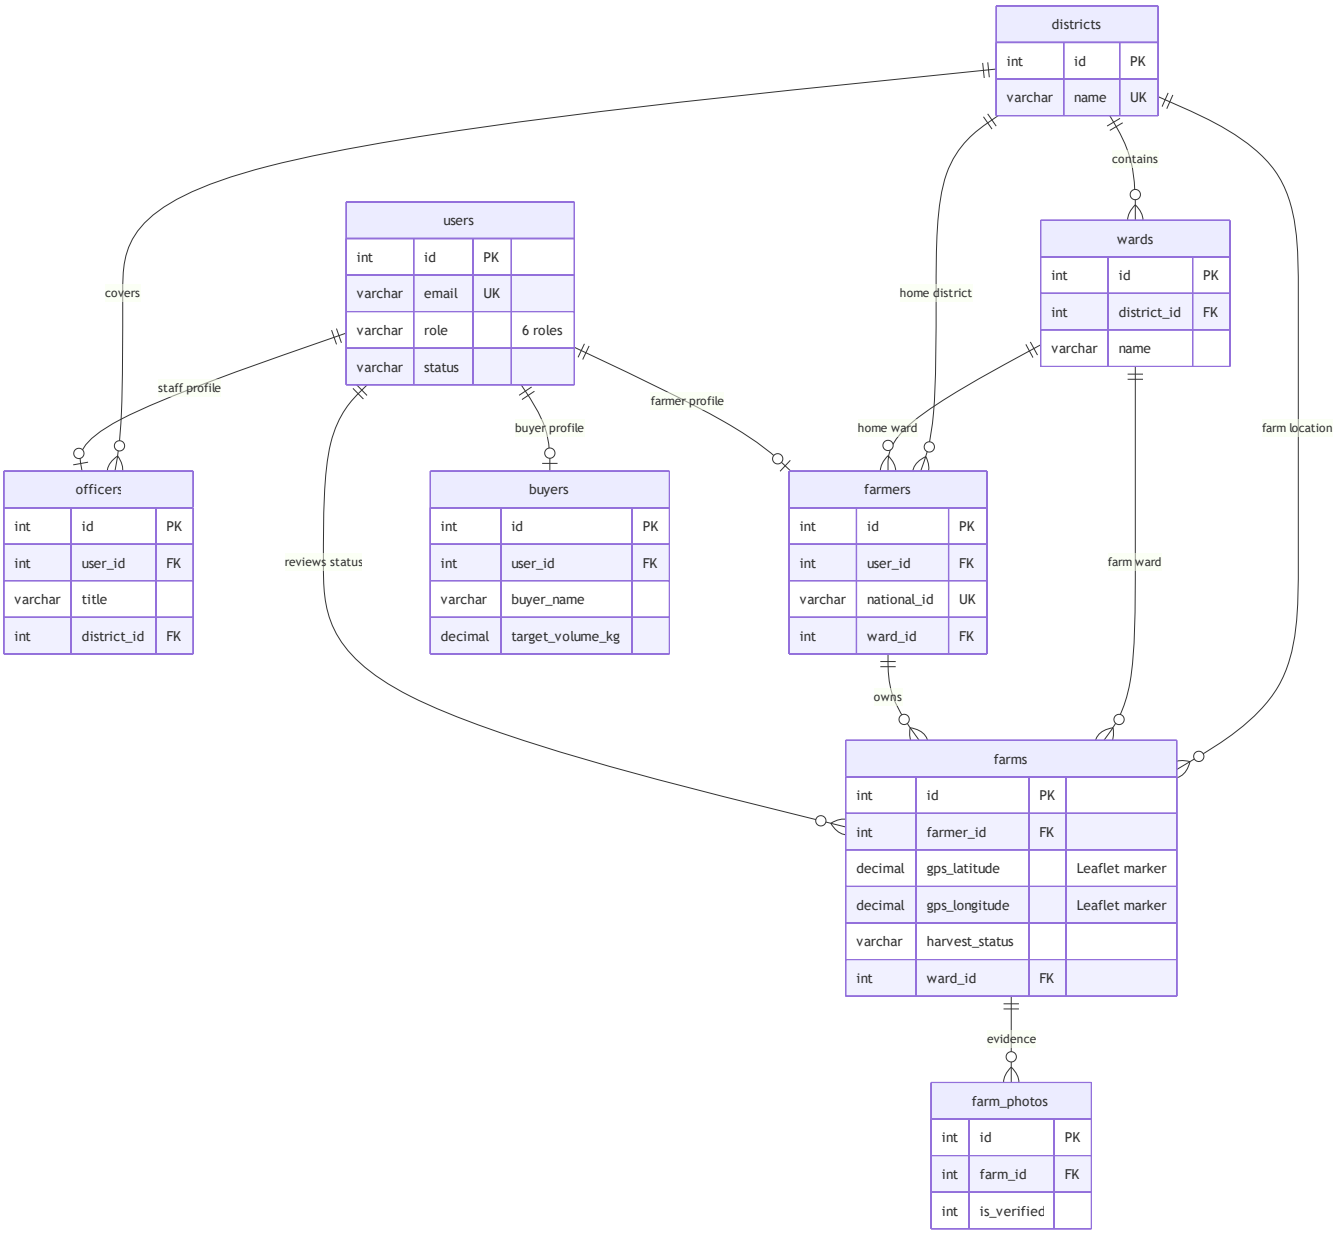

PART 3 — WEEK 3 — Linux CLI, RBAC, DB Indexing & GIS Mapping

Diagram 1 — System Architecture

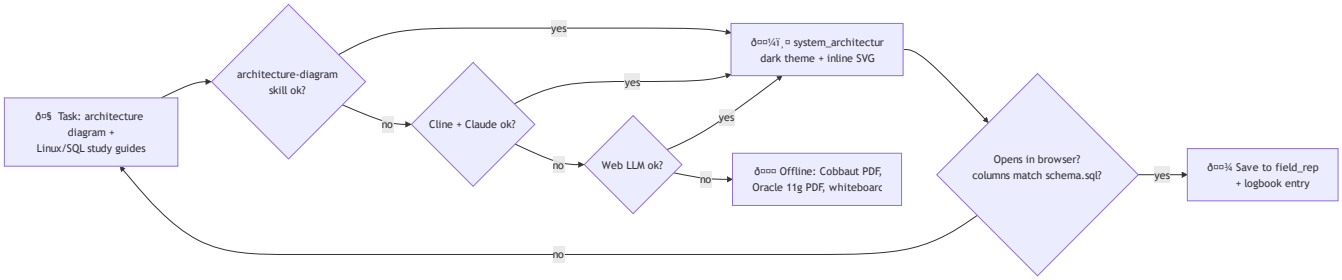

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

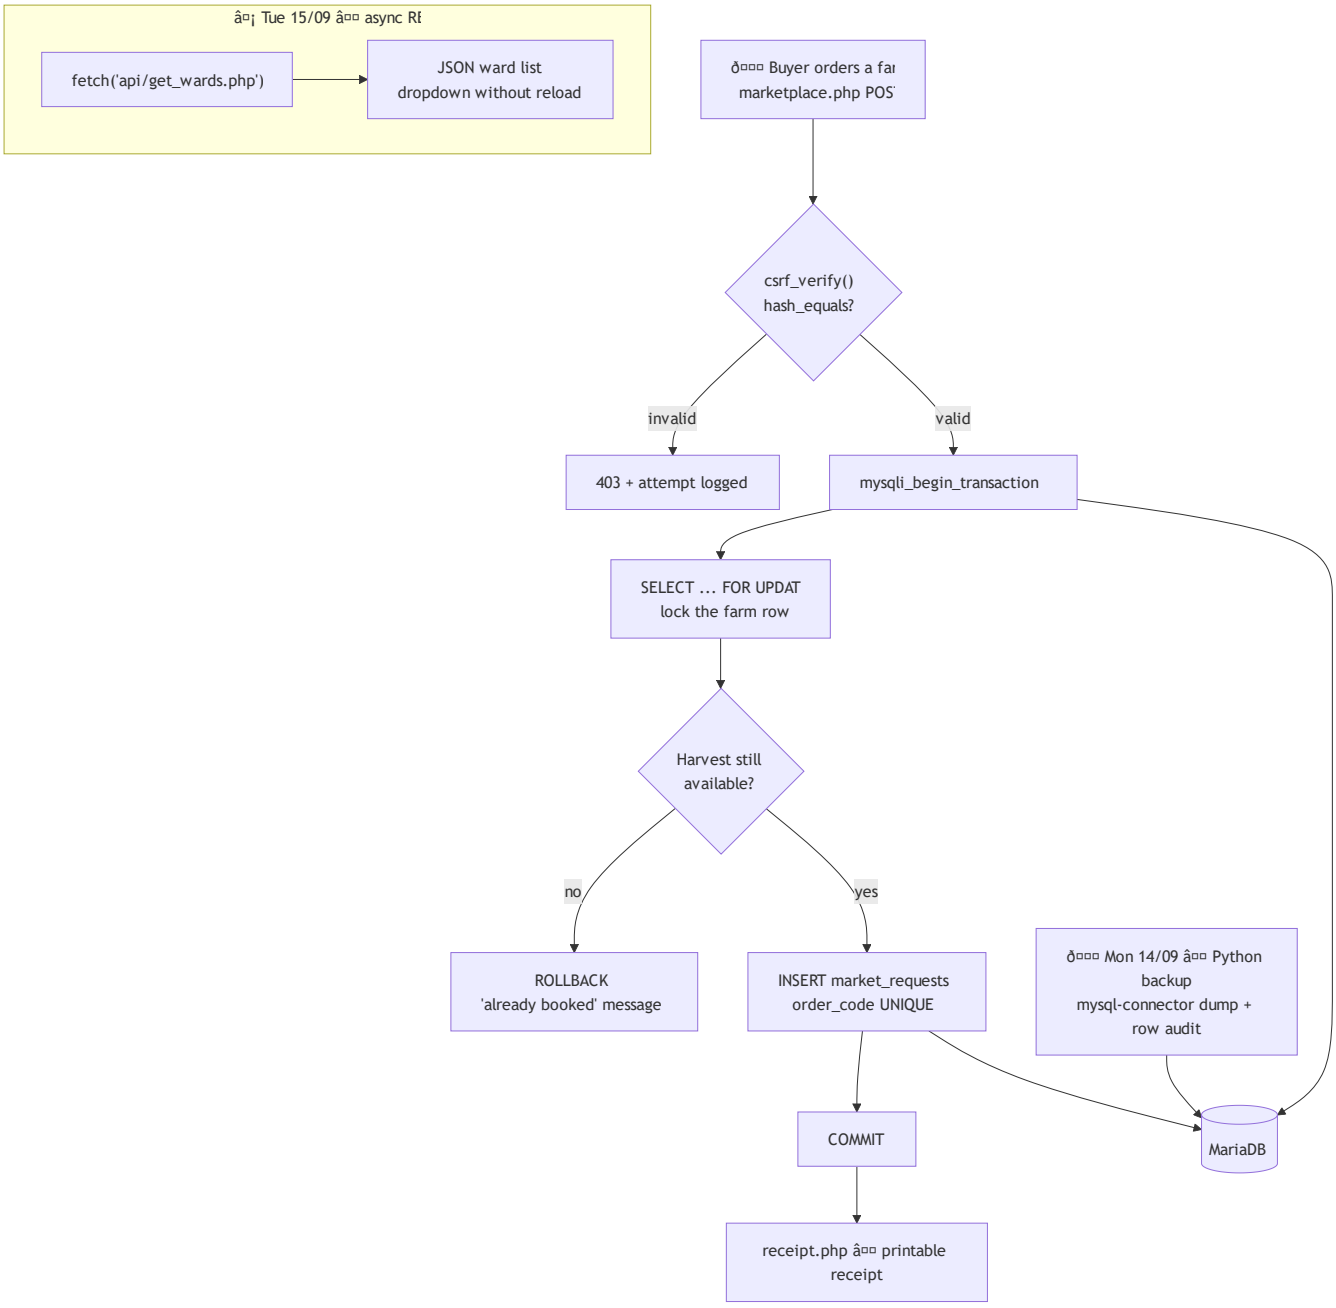

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

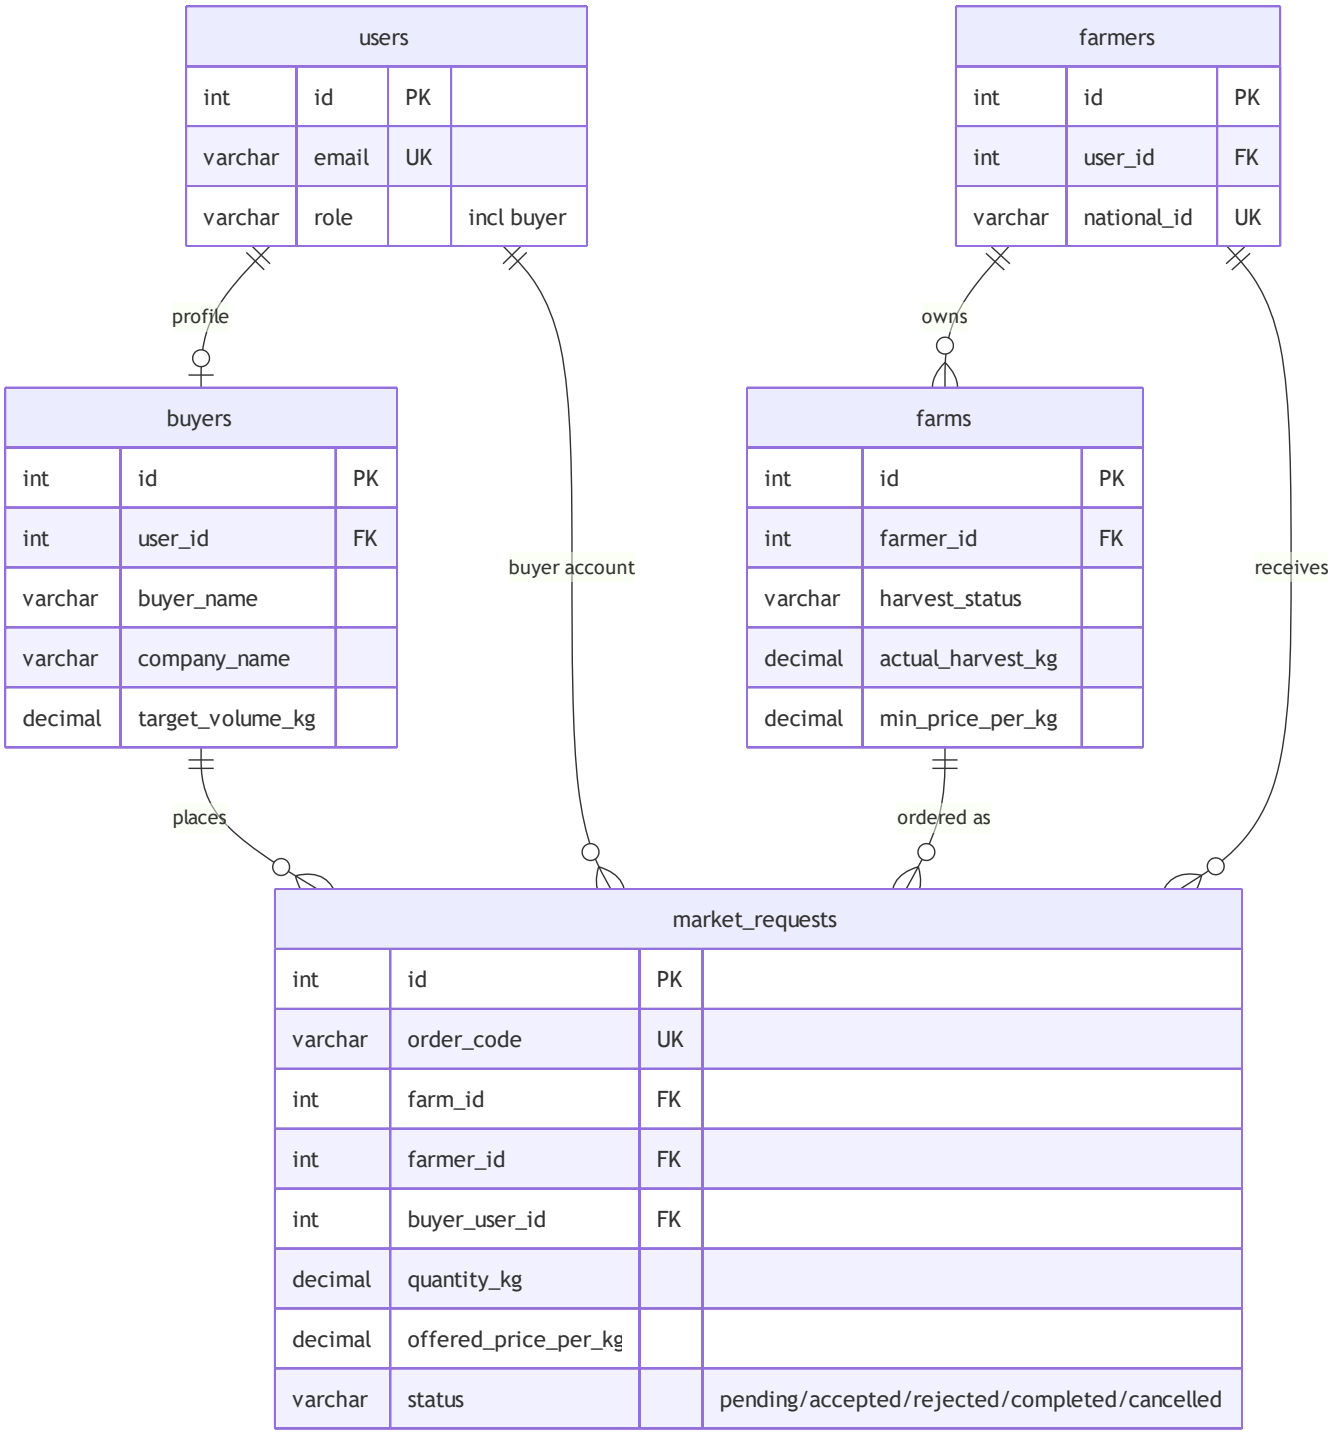

PART 4 — WEEK 4 — Python Automation, Async APIs, Security & Market Concurrency

Diagram 1 — System Architecture

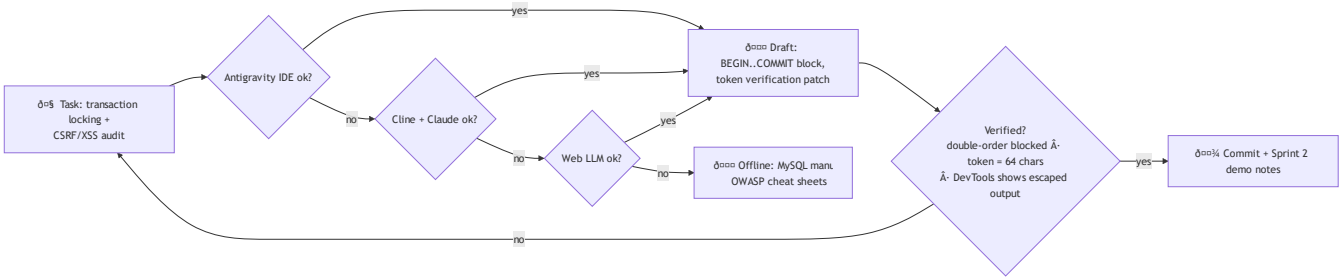

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

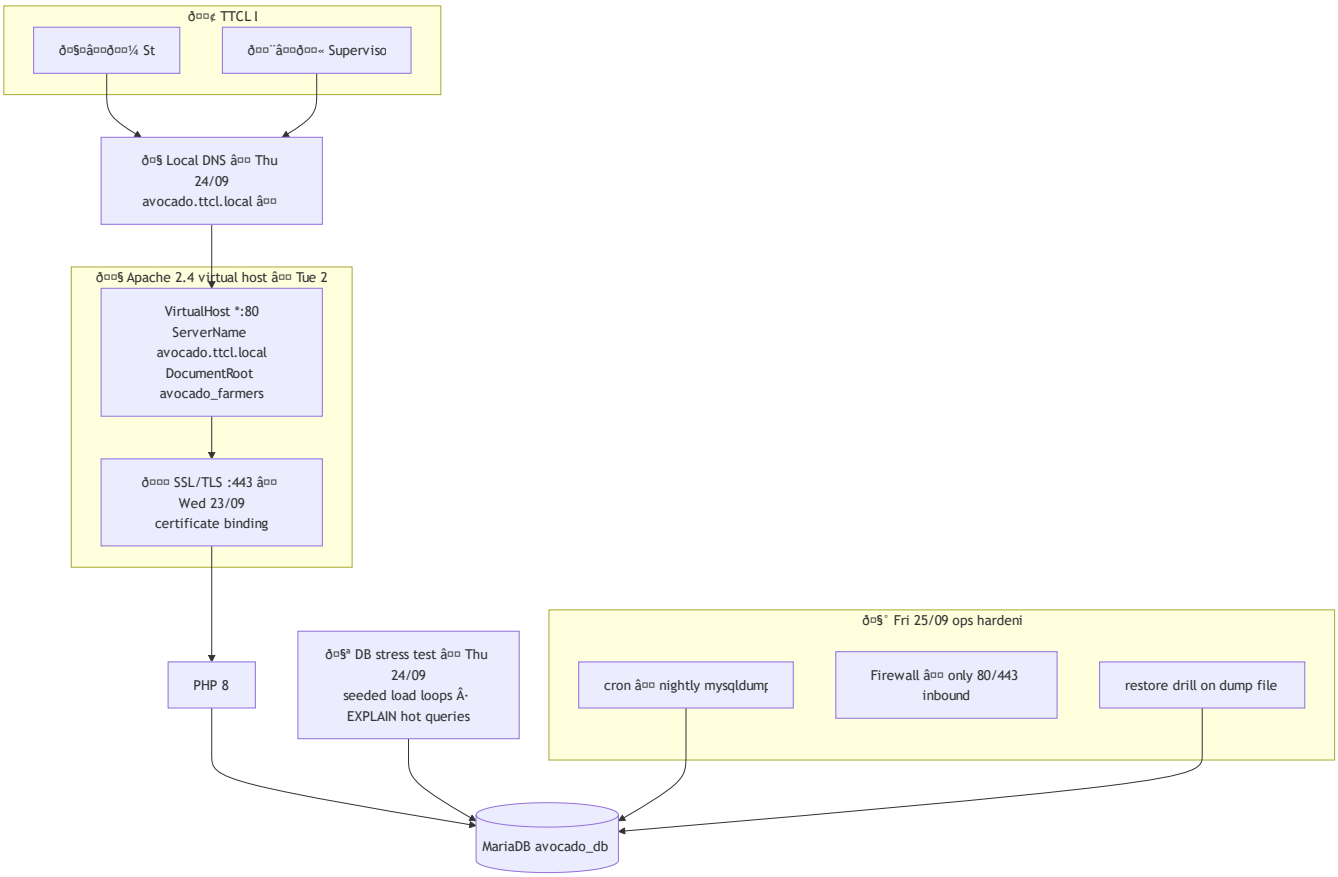

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

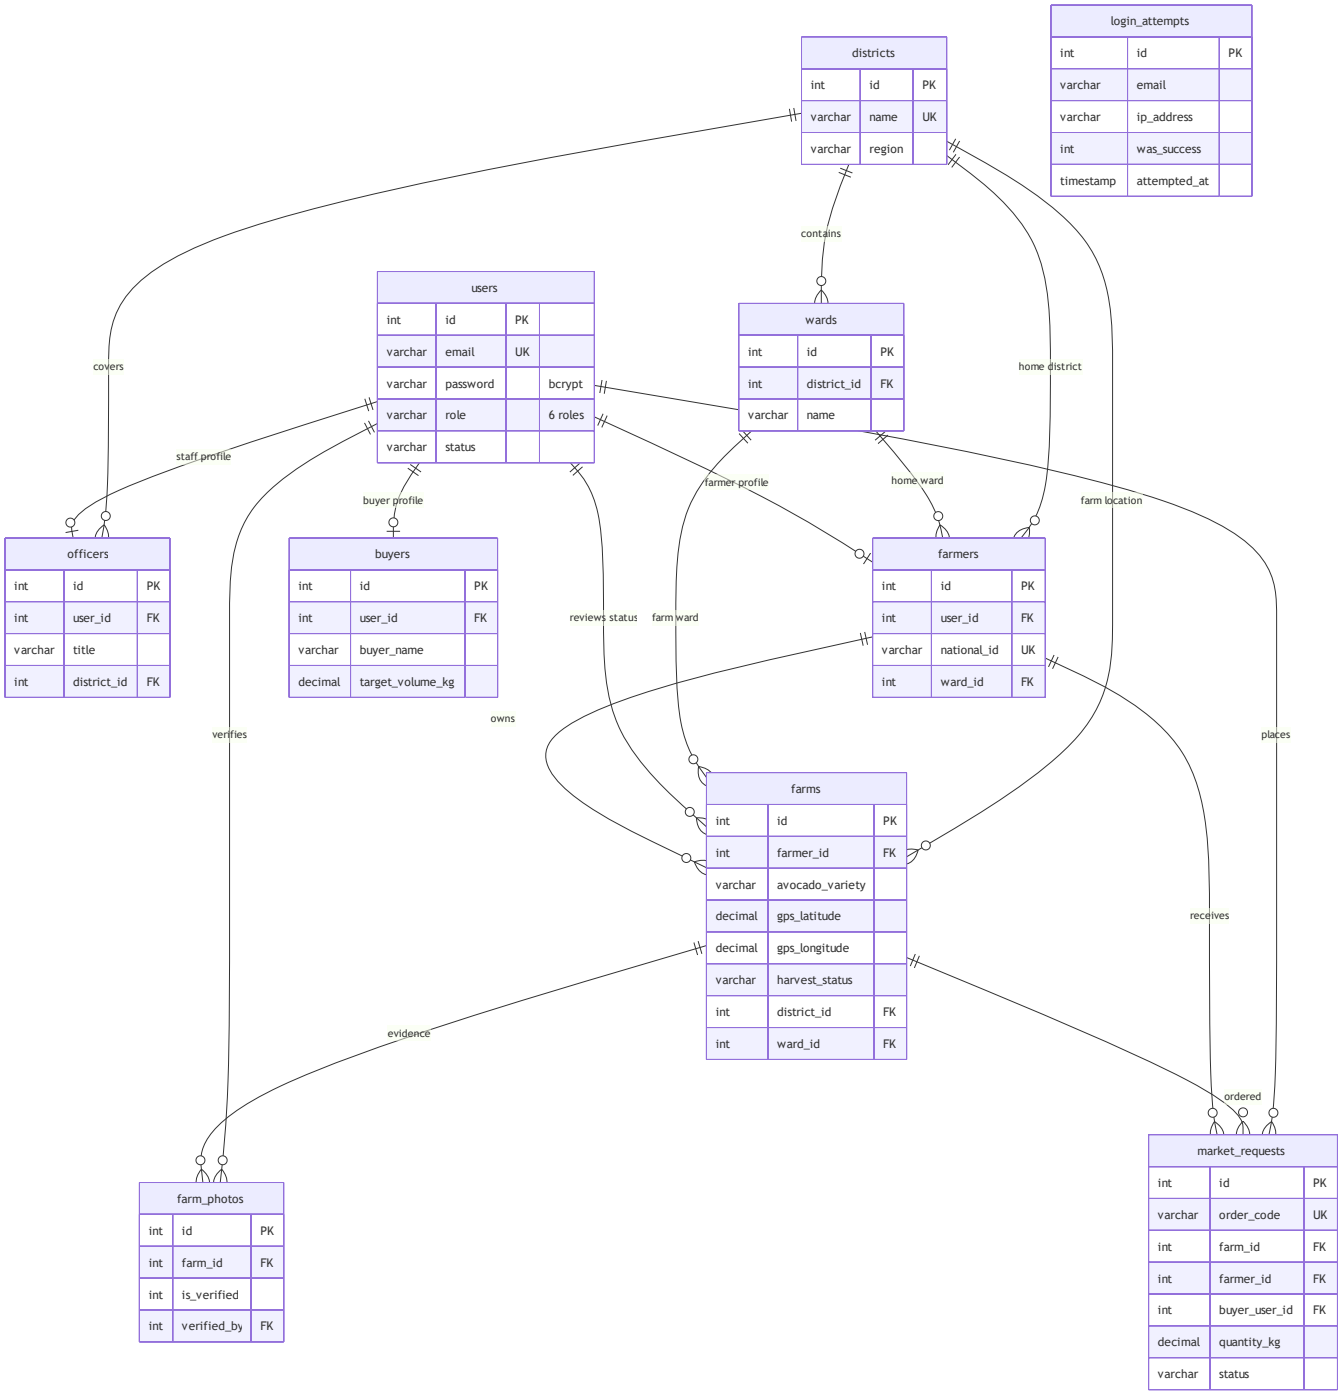

PART 5 — WEEK 5 — Sprint Review & Enterprise Web Server Deployment

Diagram 1 — System Architecture

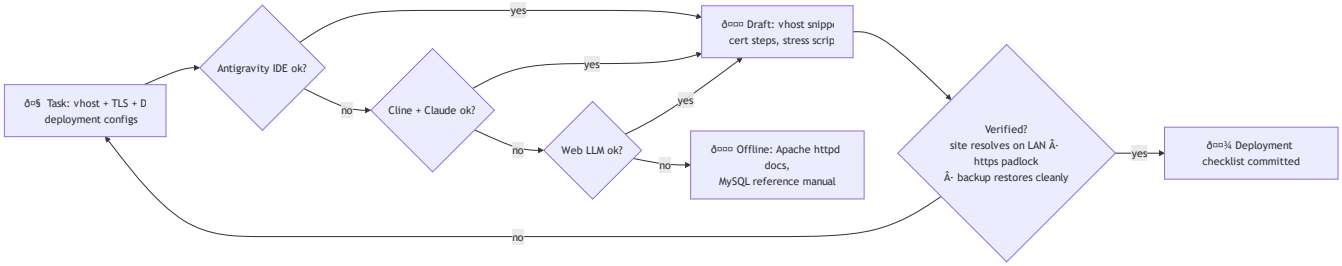

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

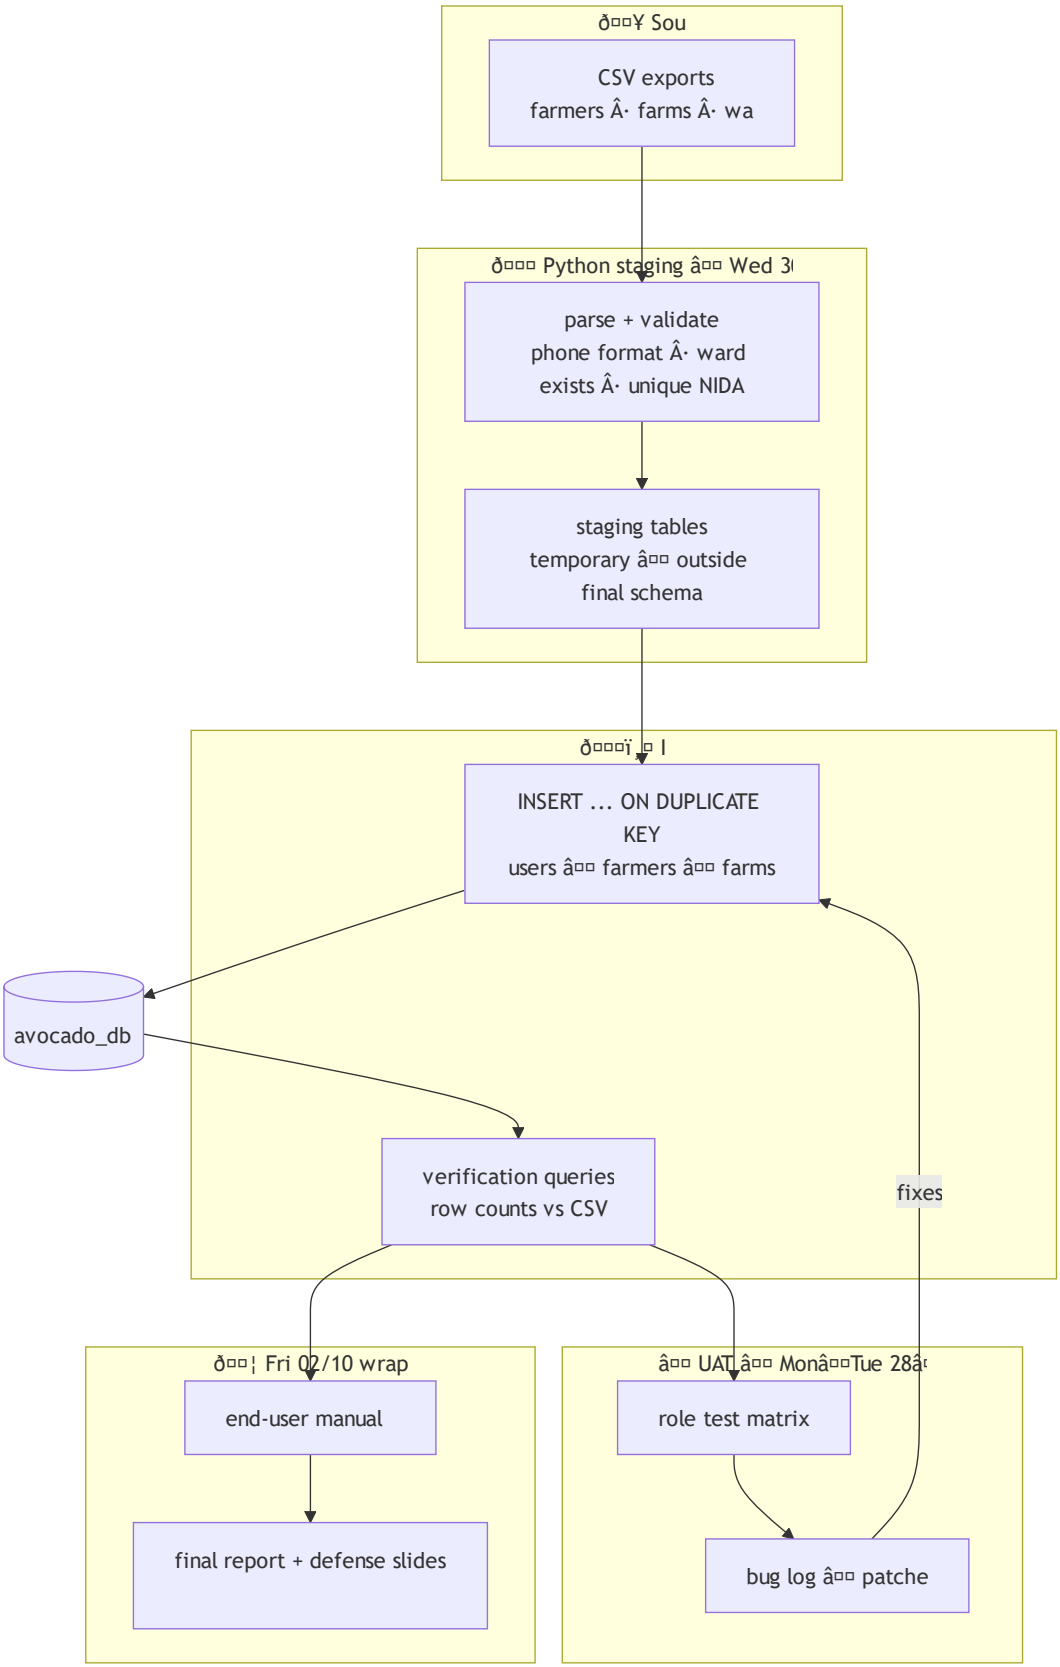

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.

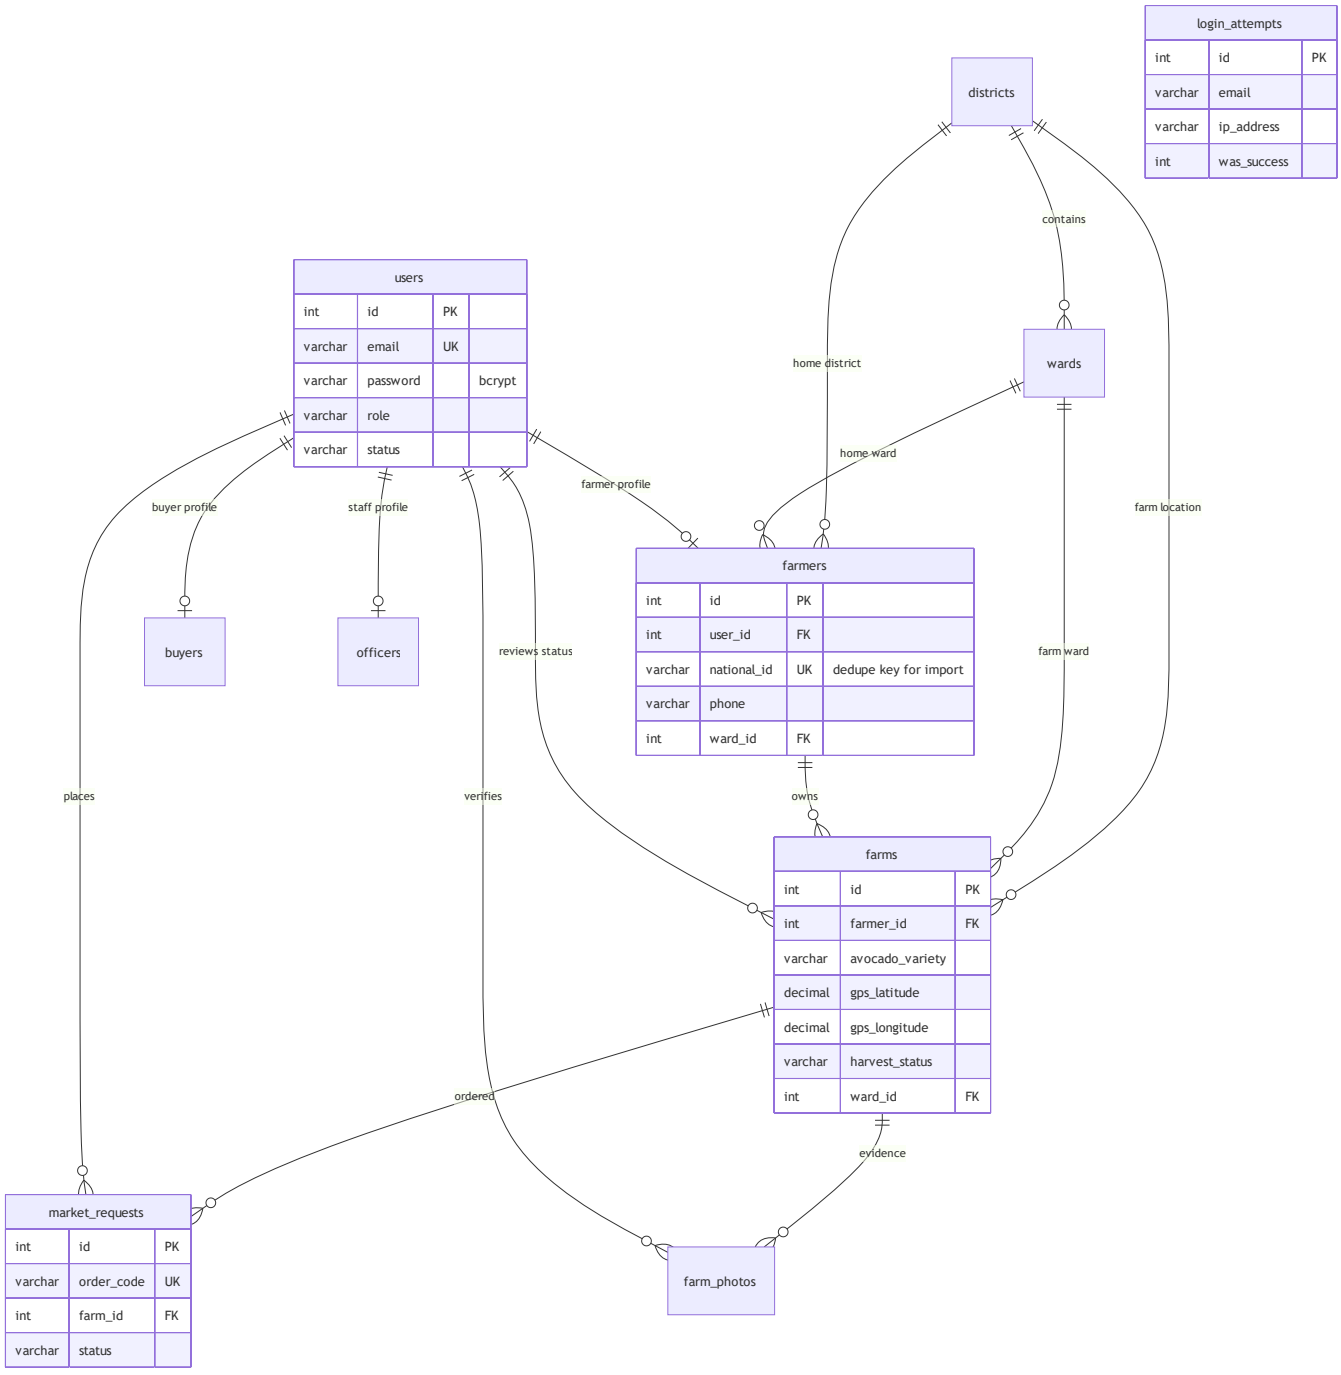

PART 6 — WEEK 6 — UAT, Data Migration, User Manual & Defense Prep

Diagram 1 — System Architecture

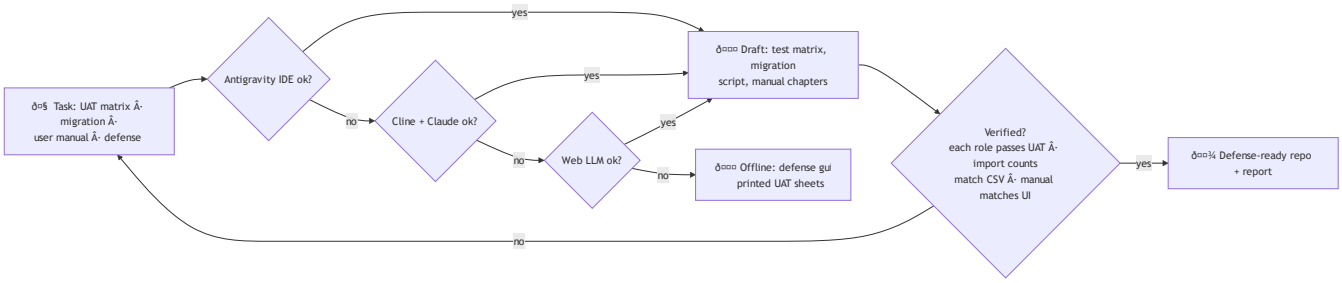

How the pieces connect: entry points, hardened request pipeline, data layer and GIS layer.

Diagram 2 — Database Relationships (ERD)

Tables and foreign keys in play this week — drawn from database/schema.sql.

Diagram 3 — AI-Assisted Fallback Chain

Escalation chain used to complete the week's task: smartest tool first, offline fallback last, nothing unverified ships.
